

QUICK START GUIDE WI-FI

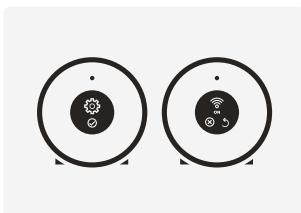

Activating Wi-Fi

1

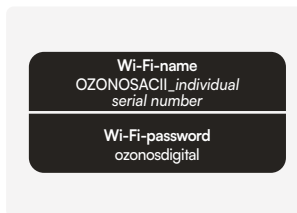

Connect the OZONOS® to a 230 Volt mains connection by plugging into an outlet. The device only needs 9 Watt when turned on, making it extremely efficient.

2

Swipe through to the „Settings“ option in the upper half of the display. Confirm by setting a check mark. Your Wi-Fi status will be displayed. **Activate your Wi-Fi by setting a check mark.** It will now glow blue instead of white.

3

The device is now functioning as an independent hotspot. Look for this Wi-Fi on your Wi-Fi-capable end-device (Smartphone, tablet, laptop etc.) in your settings under the name „OZONOSACII_ individual serial number“. Enter the following password: ozonosdigital.

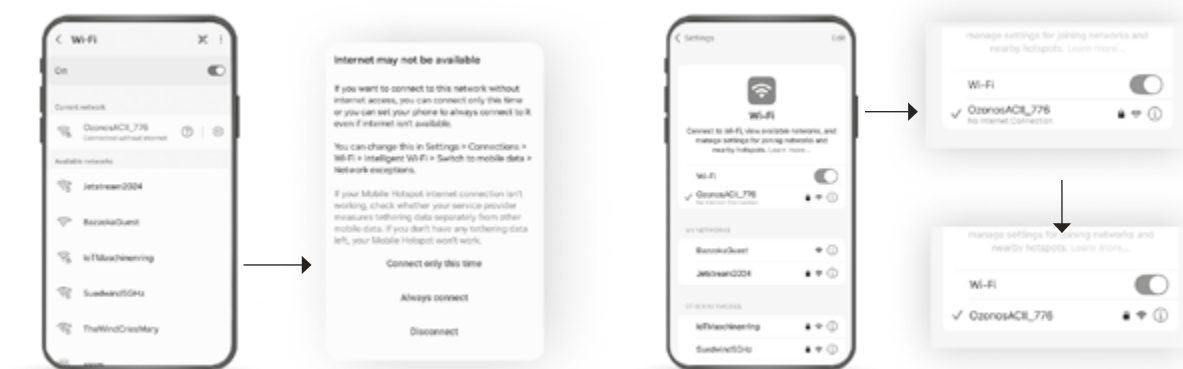

4

Scan the QR-code above using your device (Smartphone, tablet, ...) QR-Code or enter the following IP address in your browser: 192.168.4.1 The follow the subsequent directions. .

Problems?

If you cannot establish a connection with your OZONOS® Wi-Fi, follow these troubleshooting steps:

Troubleshooting for Android: If you can't establish a connection with your Android device, click on the message and respond to the option "Don't ask for this network again" with "yes".

Troubleshooting for Apple iOS: If you get the message „no internet connection“ from your iOS device, click on this connection to activate your Wi-Fi.

Complete instructions including video

If something did not function, scan the QR code on this page or just look up the instruction video on our web site under: ozonos.com/anleitungen-ozonos-produkte.

Everything worked?

Great! On the next page, you will learn how to best place your OZONOS®. If you are happy with your OZONOS® or want to give us constructive feedback, we would love to see Google-review.

ASSEMBLY INSTRUCTIONS

Free-standing placement

If you want to set up your OZONOS® on a cupboard, make sure it has a solid surface under it and the greatest possible distance from the floor to provide optimal air circulation. Loosen the back middle screw and pull the wall bracket away from the feet so that the OZONOS® can stand on its rubber feet.

Wall-mounted assembly

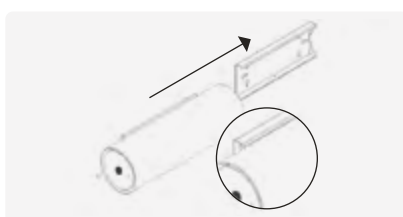

If you want to mount your OZONOS® on the wall, make sure to provide the maximum distance from the floor. Perform the following steps:

1

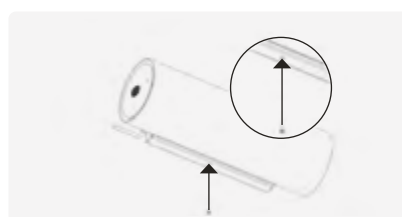

Loosen the back, middle screw and pull the wall bracket away from the feet. Mount the wall bracket at the desired location (measurements on the drawing are in millimetres).

2

Push the device back into the wall bracket. Make sure you push in the correct direction: the cable and the on/off switch must be facing away from the wall bracket.

3

To keep the device from falling, use the mounting screw provided on the back to fix it in place and screw it tight. To start the device, follow the instructions on the first page.

Note — To achieve the maximum effect, do NOT set the device up near any exhaust fan!
